

Environmental Policy Statement

Our statement of Policy for Environmental is as follow:

The Company recognises and accepts its responsibility as an employer and provider of products and services related to environmental management including consultancy, project management and monitoring of contaminated land investigations and remediation for ensuring a safe and healthy work place and preventing the creation, emission & discharge of pollutants and will take steps as are reasonably practicable to meet this responsibility.

The Managing Directors with the Management Team will regularly review the Environmental Management System (EMS) and the objectives set out to ensure the continuing effectiveness of the EMS and the Company's commitment to continual improvement in minimising the aspects and impacts associated with the activities and services supplied. The company has decided that for these reviews to be truly effective, those aspects & impacts identified will be controlled through the EMS that has been designed to meet the requirements of ISO 14001:2015.

In order to ensure the above we ask that everyone should fully implement the Company's policy and inform a member of the Management Team of any matter or circumstance which does not comply with the Company's policy.

In addition, all employees & contractors are reminded of their own duties to reduce their impact on the environment and to co-corporate with the Company so as to enable it to carry out its responsibilities successfully. Constructive suggestions from employees & contractors are welcome and will always receive careful consideration.

The most successful way that all employees & contractors can improve their own environmental performance is by being alert to all impacts, eliminating complacency and accepting their own personnel responsibilities. The Company's Management Team should be notified as soon as possible in writing of any incident that happens on the Company's premises or on site.

The company will bring to the attention of their employees, Clients & Contractors, the importance of complying with all legislation & regulations that relate to the environmental aspects of the activities, products & services supplied by the Company.

***Geo Pollution Technologies (UK) Ltd** shall ensure this environmental policy and environmental objectives are compatible with the context and strategic direction of the Company.*

This policy is communicated to all staff by permanently displaying a copy in reception

This policy is also available to the general public or other interested parties by request.
