

# Environmental Management Services

## **Bespoke Spill Response & Environmental Awareness Training**

Our spill training is built to cover all relevant legislation and to cover key points raised in Environment Agency's PPG 21: Pollution Incident Response Planning

### Course Schedule

#### Part 1 Classroom session A

- What dangers you have on site and how they can harm individuals and the environment.
- Information on the sensitivity of the environment surrounding the site e.g. SSSI's and SAC's.
- Overview of Environmental Regulators "Pollution Prevention Pays" (video optional).
- Summary of legislation and best practise guidelines.
- Case studies of spills leading to harm to people and environmental damage and prosecutions - can include previous spills by your company if requested/provided.
- Staying safe in a spill event, choosing PPE and consulting SDS's.
- Reporting procedures in the event of a spill (Environmental Regulator and sewerage undertaker).

#### Part 2 Classroom Session B

- Actions to be taken in the event of a spill (including spill simulation video).
- Work through your spill response procedures/pollution prevention plan.
- "Dry" classroom demonstration of products contained in spill kits.

#### Part 3 Practical Demonstration

- Using training from part 1 and 2 of the session delegates will be expected to clean up a spill (25L water) using 120L spill kit.

#### Part 4 Test and debrief

- 10 question test on the contents of the course. (optional)
- Debrief and chance to ask trainer any questions they may want more information on.

**Following successful course completion delegates will be issued certificates.**
