

## Environmental Management Services

### Interceptor Auditing v Interceptor Servicing - Case Study

---

#### Summary

We conduct 6 monthly auditing on over 250 interceptors for one of our major clients. The client had previously had the contents of every interceptor removed by a tanker on a 6 monthly basis believing this to be a requirement of BS EN 858-2:2003 and GPP 3.

Not only has adopting our approach helped them to achieve compliance with the guidance documents but it has also led to substantial financial and environmental benefits. The following stats are compiled over 1 financial year\*.

\* Audit data based on total all auditing costs + the total cost of performing the recommended works following the audits. Service costs based on historical data provided by the client.

**GPT 6 Monthly Auditing  
Cost - £30,000**

**Water Usage - 16,000 Litres**

**Hazardous Waste Created - 17,000 Litres**

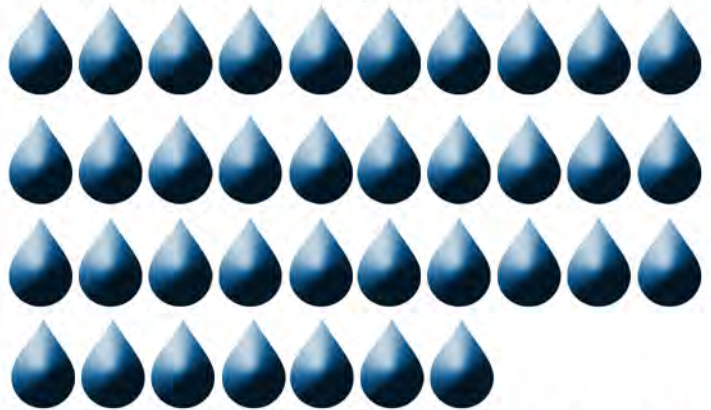

**Carbon Footprint - 3 Tonnes**

**Tanker Company 6 Monthly Servicing  
Cost £150,000**

**Water Usage - 1,120,000 Litres**

**Hazardous Waste Created - 1,120,000 Litres**

**Carbon Footprint - 12 Tonnes**
